

MANY HANDS MAKE LIGHT WORK

Collaboration between Papworth Hospital and other organisations

Our Reflective Writing and Academic Writing workshops have been shared and are used for training in various Trusts around the region and in London.

We invited regional colleagues to see a demo of KnowledgeShare and ask questions to help them make a decision on purchasing.

We visit other Trusts for training purposes and to discuss experiences and ideas for best practice with regional colleagues.

We are participating with colleagues from other Trusts on a User Needs Analysis project as well as other regional projects on service improvement.

We deliver presentations and share knowledge at TeachMeets and Can-Do Cafes as well as learning from others at these events.

We collaborate with the University of Cambridge and Anglia Ruskin University to provide Library services to students on placement.
